VOLTEDGE INFRASTRUCTURE

POWERING A SUSTAINABLE FUTURE

CAPABILITY STATEMENT | 2026

Powering a Sustainable Future

Building Tomorrow. Powering Change.

Infrastructure solutions that drive clean energy forward. Built with precision. Delivered with pride.

WHO WE ARE

A California Infrastructure Contractor Built to a Higher Standard

Founded by Andrew D. Birch, with more than 28 years of complex infrastructure delivery experience nationwide, VoltEdge Infrastructure was built to raise the standard of how programs are planned, executed, and closed out across California.

We self-perform approximately 90% of every project scope, giving us direct control over quality, safety, cost, and schedule on every program we take on. Fewer handoffs. Tighter control. Better outcomes.

CORE SERVICES AND INDUSTRIES SERVED

CORE SERVICES	INDUSTRIES SERVED
EV Charging Infrastructure Site prep, electrical, utility coordination, commissioning, and closeout	**EV Charging OEMs**
Hydrogen Fueling Stations Safety-first infrastructure for high-consequence fueling programs	**Fleet Operators**
Battery Energy Storage (BESS) Civil, electrical, and site infrastructure for storage deployments	**Municipalities and Public Agencies**

Solar Infrastructure Integrated into multi-discipline energy programs across California	**Infrastructure Developers**
Communications Infrastructure Field-ready for complex, multi-stakeholder environments	**Program Managers**
Design-Build Support Engineering through closeout via exclusive partner network	**Design-Build Partners**

HOW WE DELIVER

A Disciplined Process. Every Project. Every Time.

VoltEdge applies the same six-step delivery framework to every program, regardless of scope, location, or complexity. Not because it is a checklist. Because it is the only way to deliver consistently.

01 PLAN	We invest heavily before crews arrive. Scope review, risk identification, utility and permit coordination, design alignment, and field team preparation. The field gets everything it needs before mobilization.
02 COORDINATE	We align utilities, municipalities, OEMs, design partners, and inspectors before mobilization. We communicate proactively, flag conflicts early, and eliminate surprises in the field.
03 BUILD	VoltEdge self-performs approximately 90% of every scope: civil, electrical, equipment installation, and field operations. We own the quality, the safety, and the pace of the schedule.
04 QA / QC	Quality is checked in the field daily, not at the end. We correct issues immediately and maintain standards that hold up under any inspection.
05 COMMISSION	We support the transition from built to operational. Thorough, documented, and completed to the owner's standards every time.
06 CLOSE OUT	Closeout receives the same urgency as startup. Documentation complete. Punch lists resolved. Systems handed over as promised. When a project closes under the VoltEdge name, it is finished.

THE VOLTEDGE STANDARD

Not Values on a Wall. An Operating Framework.

Safety. Quality. Cost. Schedule. In that order. Every time. These four principles govern every decision, before the first crew arrives on site and long after the final punch list is cleared.

SAFETY Protects people, sites, and operations. First priority on every project, every day.	**QUALITY** Work is done to standard, or it is done again. No other outcome is acceptable.	**COST** Controlled through planning and field discipline. Not discovered through surprises.	**SCHEDULE** Earned through preparation, coordination, and execution. Not luck.

PAST PROGRAMS INCLUDE

VoltEdge leadership has delivered complex infrastructure programs for some of the most demanding operators and OEMs in the country.

Black and Veatch	Electrify America	Tesla	Rivian	True Zero

CREDENTIALS AND COVERAGE

Contractor License	Lic. #1160202 | Classifications A, B & C-10
Headquarters	8285 E Santa Ana Canyon Rd, Ste 135-316, Anaheim Hills, CA 92808
Service Area	Statewide California
Leadership	Andrew D. Birch, Founder and Owner | 28+ years of complex infrastructure delivery
